

# Homework Year 5 Summer 1

## Kensuke's Kingdom

Choose as many of the following activities as you wish:

- Computing

Record and edit a film trailer for Kensuke's Kingdom.

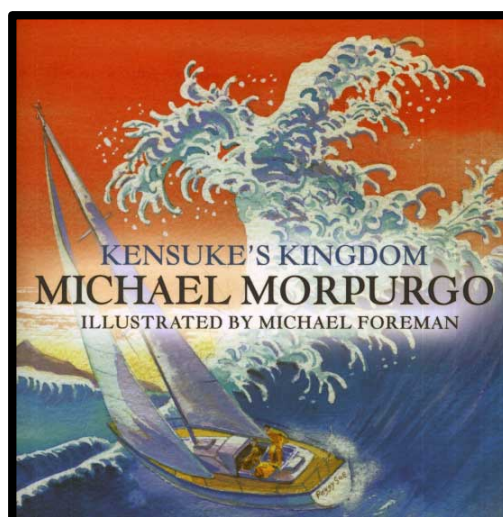

If you want to be really technical, you could recreate the island in Minecraft and screen record gameplay to create moving images. Shadow Puppets Edu is a free app that can then be used to sequence images/videos and record voiceovers.

- D.T

Design and build a vessel that could help Michael escape from the island. Think carefully about the properties of each material that you use.

- Art

In chapter 2, Michael is asked to sketch all of the plants and creatures that he comes across whilst sailing the globe. Create your own sketchbook of wildlife in our local area.

- English task

Create an informative leaflet about surviving on-board the Peggy Sue.

Think about: the different roles and responsibilities; health and safety advice; a floor plan of the yacht; recommendations of places to visit; foods that have a long expiry date; how to navigate etc.

- Maths task

Watch this tutorial on how to use a protractor: <https://www.youtube.com/watch?v=ABgR-QaMrSU>  
Complete the maths worksheet by measuring each of the angles.

We look forward to sharing and displaying your homework at the end of half term.
