

## Homework Year 6 Spring 2

### Wallace and Gromit – ‘Cracking Contraptions’

Choose as many of the following activities as you wish:

- History task – research a contraption in your house.  
Find out: When was it invented? How has it changed since it was first produced?
- Art/DT task – draw, design or make your own contraption.
- Geography task – investigate regions of the world where contraptions are made. Why are the factories located there?
- Music task – create a piece of music to advertise a contraption or to play while it works – or goes wrong!
- English task – choose and write in any genre you enjoy, linking it to a contraption.
- Maths task – write word problems (as many steps as you like) about a contraption.

We look forward to sharing and displaying your homework at the end of half term.
