

Welcome to 3A

Class Teacher: Mr Austin

Teaching Assistants:

Mrs Parums and Mrs Barclay

Our P.E lessons will be Tuesday and Thursday.

Please see the Curriculum Overview for what we are learning about this term.

Update April 2018

Maths

This half term we will be consolidating and building upon the work we have done with number. We will initially be focusing on shape and recognising angles as a property of shape or a description of a turn. As part of our shape work we will be recognising 3-D shapes in different orientations and describe them. Following on from this we will be looking at measurement. We will be comparing, adding and subtracting: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml).

English

In English we will be concentrating on a range of text types. We will be writing stories based on George's Marvellous Medicine focussing on the use of description. Following on from this, we will be learning how to write non chronological reports. The emphasis being on the type of language used and the purpose of the structure. We will research our information using ICT and information books and we will be linking this to our Creative Links.

Science

In Science next half term, we will be concluding our work on 'Forces and Magnets' and then moving on to 'Rocks.' We will be supporting the children to compare and group together different kinds of rocks on the basis of their appearance and their simple physical properties. We will also describe in simple terms how fossils are formed when things that have lived are trapped within rock.

Creative Links

Our focus in Creative Links will initially be DT. We spent last half term learning about the purpose of packaging and how to create a variety of shell structures. The children will spend the first three weeks of the half term working to independently apply the skills they have been taught to create their own product packaging. The next three weeks we will be focusing on music where we be learning a variety of musical terms based on untuned percussion.
